EDUCATION

University of Central Florida/Burnett Honors College — May 2026
Bachelor of Science in Computer Science — *3.7 GPA*
Relevant Coursework: *Data Structures and Algorithms I & II, Object-Oriented Programming, Computer Logic, Cybersecurity, Systems Software, Discrete Math, Calc I & II*

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML/CSS, SQL, Java, Python, C/C++, Assembly, C#, Go
Technologies: NextJs/React, Svelte, Tailwind, PostgreSQL, NodeJs, ExpressJs, Flask, AWS, Vercel, REST, Prisma, MongoDB, GraphQL, Go-Jet, Clerk
Libraries/Tools: Numpy, Pandas, Keras, Tensorflow, PyTorch, Scikit-Learn, Seaborn, Librosa, Matplotlib, Git, Linux, Figma, Google Cloud, Microsoft Products

WORK EXPERIENCE

AI Software Developer Intern — Jul. 2024 – Present
Resilience, Inc — *Remote*
- Developed a **Speech and Emotion recognition AI** model to assist K-12 students with mental health learning and understanding
- Increased **model accuracy** by **45%** through **data augmentation**, batch **normalization**, weight adjustment, and audio centered **feature extraction**
- Collaborated to combine new additions to the model and effectively run tests through simulated data and various acted out datasets

Digital Summer Instructor/Tutor — May 2024 – Aug. 2024
iD Tech — *Remote*
- Mentored students on game, chatbot, terminal, and AI project development
- Tutored **30+ kids** aged 9-17 on **programming fundamentals** and **AI/ML concepts**
- Helped redesign and **improve** various **AI course** plans to match modern frameworks and technologies such as **PyTorch and Pandas**

PROJECTS

Simply-ASL | *PyTorch, Flask, Swift, OpenCV*
- Enginereed a **Speech to ASL** mobile app using **inference and computer vision**
- Created an **LSTM model** for **intermediate frame generation** using PyTorch
- Connected and mantained the framework through **webhooks and API structuring**
- Processed and created a dataset for real time **2D pose estimation** using inference with **Meta's Sapien model**

Bouquet.Gen | *NextJs, Flask, PostgreSQL, Machine Learning*
- Implemented **OpenAI's** API to create dynamic bouquets based on user input
- Utilized Figma for **Ui/UX planning**, Vercel for deployment, and Git for version control
- Developed a full-stack web application with Flask serving as a **REST API** backend and React as the frontend

COPR | *NextJs, Go, Go-Jet, PostgreSQL, Tailwind*
- Developed a web app to improve coding practice routines through **statistical analysis** leading to a **200% increase** in productivity
- Implemented the Sessions and Account data **backend routes** to handle **live authenticated** coding sessions.
- Lead frontend developer responsible for designing and implementing the frontend in full

CAMPUS INVOLVEMENT

ACM Website Backend | *NodeJS, ExpressJs, MongoDB, Javascript, HTML* — Jan 2024 – April 2024
- Worked with a large team to develop a backend for ACM's main website
- Created a **CRUD** system to store club events to be used internally and display on the main website
- Implemented a **fully authenticated panel** allowing for a centralized center for club duties improving club efficiency
